

# Pierdomenico Reitano

Full Stack Developer focused on intuitive, accessible interfaces, code quality and collaborative delivery.

## Relevant Experience

### Full Stack Developer · **Farport Software S.r.l**

Sep 2023 - Present

- Build Angular and React applications and Node.js microservices with NestJS; contribute to shared internal and open-source utility libraries.
- Write unit tests with Vitest to validate application behavior and support reliable releases.
- Work across integrated projects using Spring Boot and Directus.
- Design and develop AI integrations that connect model capabilities with application logic and workflows to address practical business needs.
- Manage Google Cloud and AWS deployments and GitHub Actions CI/CD pipelines, with a focus on maintainability and security.
- Build and refine Claude Code harnesses, combining project context, tool configuration and automated checks to guide reliable AI-assisted development.
- Deliver AI literacy training, mentor junior developers and contribute to R&D initiatives.

### Front End Developer · **Myvirtualab**

Oct 2022 - Sep 2023

- Translate client needs into actionable technical requirements and align delivery across teams.
- Develop mobile applications with React Native and maintain scalable internal libraries.

### Full Stack Developer · **Lotrèk**

Mar 2015 - Jun 2022

- Built an internal UI framework to standardize front-end development across projects.
- Developed Angular and Vue applications, headless WordPress and Jamstack solutions, and Django REST APIs with database integration.

### Freelance Front End Developer & UI Designer

Oct 2014 - Mar 2015

- Delivered projects independently, from UI design through development.
- Used web analytics and A/B testing to understand user behavior and improve digital products.

### Front End Developer & UI Designer · **Register.it**

Jan 2011 - Oct 2014

- Built user interfaces and conducted usability tests to improve user experience.
- Collaborated in one of the company's first Scrum teams, developing practices for prioritization and delivery.
